

ROBERT KOTELES

Senior Frontend Developer, Technology Lead

📞 07405768373 ✉ koteles.roberto@gmail.com 📍 London, UK

Dear Hiring Manager,

With 17 years of demonstrated web developer experience, a deep commitment to collaboration, and a proven track record of delivering high-quality, responsive, and accessible web solutions, I am confident in my ability to contribute effectively to your organization.

Having extensively worked with JavaScript frameworks, especially React, I possess a profound understanding of JavaScript ES5, ES6, and ES2017. I know Typescript, TailwindCSS and similar modern approaches. My expertise in CSS extends to frameworks like Bootstrap, SemanticUI, and MaterialUI, coupled with a comprehensive knowledge of SASS/LESS and responsive design techniques using CSS Grid/Flexbox. My recent involvement in a governmental project has deepened my knowledge, enabling me to develop websites that meet AA level of WCAG standards and are fully responsive. My contribution helped them to earn over £10 million through the web solutions.

In one of my previous roles at Samsung, I effectively contributed to the company's success (and earned over £3.6 million for them), demonstrating my ability to drive high profits through innovative and efficient web development solutions. I am confident that my technical skills, leadership experience, and commitment to excellence make me a perfect fit for the role.

Furthermore, my proficiency in state management tools like Redux and my hands-on experience with task runners, notably Webpack, enables me to build scalable and efficient applications. I have a strong grasp of asynchronous request handling, partial page updates, AJAX, and have utilized testing frameworks such as Jest to ensure the quality and performance of the developed solutions.

One of my core strengths lies in my ability to collaborate seamlessly with design teams. I have consistently transformed prototypes into pixel-perfect, fully responsive, and accessible websites. Additionally, my mentoring capabilities have empowered other developers through knowledge sharing sessions, fostering a culture of continuous learning and growth within the teams I have been a part of.

I bring to the table a comprehensive understanding of the Atlassian suite of tools, including JIRA, Bitbucket, and Confluence, streamlining project management and enhancing team collaboration. As a certified Senior Scrum Developer, I am well-versed in agile methodologies, ensuring timely delivery and alignment with business objectives.

Notably, my contributions to Samsung have significantly impacted their digital landscape, driving profitability and enhancing user experiences. My recent involvement in a governmental project further enriched my expertise, enabling me to develop websites that adhere to AA level of WCAG standards while maintaining responsiveness and accessibility.

- **Proficiency with Node.js and React:** Over the years, I have extensively utilized Node.js and React to design and develop high-quality, scalable applications.
- **Experience with API Integration Methodologies and Webhooks:** My expertise encompasses a solid understanding of API integration methodologies, Webhooks, and RESTful APIs.
- **Familiarity with Agile Development Methodologies:** As a certified Senior Scrum Developer, I am well-versed in Agile development methodologies, fostering a collaborative environment, prioritizing tasks efficiently, and delivering results within the deadlines.
- **Version Control Systems and Collaboration Tools:** My proficiency with the Atlassian suite of tools, including JIRA, Bitbucket, and Confluence, plus Git, ensures streamlined code collaboration, version control, and effective project management.
- **Mentorship and Collaboration:** Throughout my career, I have championed knowledge sharing, mentored junior and senior developers, and collaborated closely with design teams from conceptualization through to implementation, ensuring accessibility and pixel-perfect execution.

For my excellent private projects (mainly React) feel free to visit my portfolio page (http://domainforssl.hu/portfolio_new), my GitHub (<https://github.com/kotelesroberto>) or simply ask me for more details.

I am enthusiastic about the opportunity to discuss how my background, skills, and certifications align perfectly with the role. Thank you for considering my application. I look forward to the possibility of contributing to your organization.

Warm regards,
Robert Koteles
